

MAK8 Terminal System

The *MAK8* is a compact terminal system suitable for a wide array of high current automotive applications. Its lamella contact area provides a unique combination of reliable contact, excellent current ratings and low mating efforts, making it ideal for standard plug-in connections.

Product Features

- Current rating: 100A continuous @ 80°C with 16mm² cable
- 2.5 – 16.0mm² crimping range for both sealed and unsealed applications
- Mates to blades 8.0 – 9.5mm wide and 0.8 to 1.2mm thick
- Available with Sn and Ag surface finish
- Designed for use on Lear PowerFuse and VariaFuse system

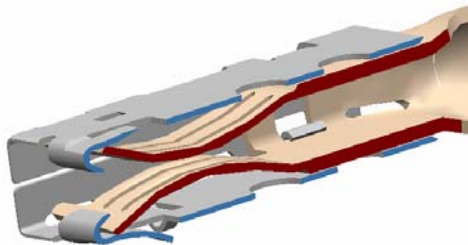

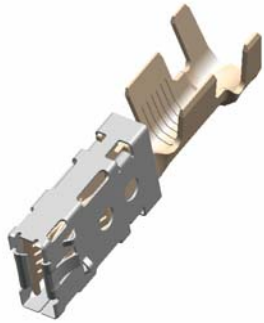

Customer Advantages

- Compact terminal with excellent current rating
- Wire size range, technical performance and compact size make terminal suitable for wide array of applications
- Use on Lear PowerFuse and VariaFuse eliminate need for eyelet terminals and associated bolts and nuts
- Low mating efforts make terminal suitable for standard connector applications
- For use on sealed and unsealed applications

Status: In Production
