

Unsealed Pre-Fuse Box

Sealed Pre-Fuse Box Solution

Integrated Pre-Fuse Box Solution

## Pre-Fuse Boxes

Protection of main power distribution cables with a compact, inexpensive and flexible components is offered by Lear's pre-fuse box solutions. Lear's *VariaFuse* provides design flexibility to optimise component packaging. In combination with the *MAK8* and *MAK12* direct connection it is easy to install and to service. Integration of active devices and battery terminals is possible, as are sealed boxes.

### Product Features

- Low profile multiple fuse element for minimum packaging
- Direct connection with *MAK8* and *MAK12* terminal and connector systems
- Further integration of active components and battery terminals possible
- Solutions for sealed and unsealed applications

### Customer Advantages

- Protection of main power distribution cables
- Saving in weight, package space and assembly time compared to traditional solutions
- Direct connection with *MAK8* and *MAK12* terminal system eliminates need to bolts and nuts
- Sealed and unsealed component solutions possible for use in either engine or passenger compartment
- Design flexibility allowing different box types on or adjacent to battery

**Status: In Production, Concept**
