

Self Aligning Connector

Lear's self aligning connector concept can be adopted to seats, door trim, headliners and other applications that require an easy-to-use connector solution. Its forgiving design and large tolerance adjustment makes fast, efficient assembly of seats and trim possible without the need for complicated harness routing.

Product Features

- Compact design
- Use of standard terminal systems
- Can be customised to different terminal systems and sizes
- Can be used with flat cable or conventional round cable
- Tolerance adjustment +/-2.5mm horizontally and +/-3.5mm vertically

Customer Advantages

- Simplification of seat and trim assembly
- Reduction in assembly time by simple plug-in of trim panel or seat
- Reduction of harness overlenghts required for assembly and risk of noise and rattle
- Easy to service

Status: Concept
