

StarterFuse

Inexpensive passive device offering short circuit protection for the starter-generator-circuit. Lear's *StarterFuse* is a compact device mounted directly to the battery and protecting the primary starter-generator-circuit from overloads. The device protects from hazardous situations created by short circuits.

Product Features

- Short circuit protection on starter-generator-circuit
- Robust against starter in-rush current
- Directly mounted to battery terminal
- Flexible with bolt-down or crimp connection
- Compact size

Customer Advantages

- Inexpensive and compact protection device for battery cable
- Protection from hazardous situation in case of short circuit
- Not sensitive to starter in-rush current
- Harness design flexibility with either bolt-down or crimp connection

Status: In Production
